

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

The following MD&A with its effective date of **July 28, 2010** for E-Energy Ventures Inc. (the "Company") should be read in conjunction with the Company's audited financial statements for the year ended March 31, 2010. The financial information in this MD&A is derived from the Company's audited financial statements which have been prepared in accordance with Canadian generally accepted accounting principles. All amounts are in Canadian dollars unless otherwise specified.

This MD&A may contain forward looking statements and information based on assumptions and judgments of management regarding events or results that may prove to be inaccurate as a result of factors beyond its control. Actual results may differ materially from the expected results.

Overall Performance

E-Energy Ventures Inc. ("E-Energy" or "the Company") is engaged in the acquisition, exploration and development of mineral properties. The Company holds a 100% interest in a molybdenum/tungsten property in the Stormy Mountain District of the Yukon Territories and a 100% interest in gold properties in the Red Lake District (the Rivard Project and Uchi Lake Property in northwest Ontario). More recently, the Company has broadened its exploration and investment activities outside Canada by acquiring a 10% equity interest in a mining company located in Mexico. All of the Company's activities to date have been of an exploratory nature. Mineral exploration business is risky and most exploration projects will not become mines. The Company has not generated any operating revenues to date. The Company is dependent on the equity market to finance all of its activities and it is anticipated that it will continue to rely on this source of funding for its exploration expenditures and to meet its ongoing working capital requirement.

Stormy Mountain Molybdenum Property, Yukon Territory

In February 2005, the Company acquired a 100% interest in 20 mining claim units located in the Pelly Mountains of south central Yukon Territory, referred to as the Stormy Mountain Molybdenum Property (the "Property"). In consideration, the Company had paid \$75,000 in cash and issued 2,000,000 common shares from the Treasury to the Vendors. The Property was subject to a 2% Net Smelter Royalty ("NSR") with the Company having the right to purchase 1% of the NSR for \$1,000,000 from the Vendors.

The Property consists of 20 staked quartz claims covering approximately 1,000 Ha. Past work indicates that Stormy Mountain has good potential for the discovery of zones containing high grade (> 0.5%) molybdenum and tungsten. Molybdenum and tungsten are both strategic metals which are used to create speciality steel products. These metals add strength and hardness to steel for uses such as oil/gas pipelines. Prices for both molybdenite and tungsten are at or near record high price levels and the metals are in short supply. The Company conducted some preliminary consulting work in the past year. Due to the economic downfall, the Company has decided to defer the exploration program. The Company's current goal is to maintain the mining claims in good standing for future exploration or joint venture.

Rivard gold property at Red Lake, Ontario

In July, 2006, the Company entered into an assignment agreement to obtain an option to earn a 100% interest in the Rivard property mineral lease at the west end of the Red Lake gold mining camp in northwest Ontario. To exercise such option, the Company is required to make cash payment of \$500,000 over 4 years and to issue 2,500,000 common shares. The property is subject to a 3% net smelter return

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

royalty. As of the date of report, the Company had made the required payments totalling \$280,000 in cash and issued 2,500,000 common shares to the vendors.

The 90 hectare Rivard property comprises 6 leased mining claims, 23 kilometres west of the town of Red Lake. Several gold-bearing zones are known on the property from exploration that has gone on at intervals since the 1930s. The main gold-bearing zone extends over a length of at least 250 metres and is hosted by a mixed assemblage of tuffs, intrusive porphyries and serpentized ultramafic rocks. Gold occurs as spectacular splashes in quartz and quartz-carbonate veins and stringers and in association with disseminated pyrite.

The Rivard property shows several geological similarities to the gold mines in the main Red Lake mining camp, as exemplified by the Campbell and Goldcorp Red Lake mines. Stratigraphically, both areas feature an unconformity with neoarchean sediments resting on mesoarchean volcanic rocks; both have extensive carbonate alteration; both are situated in areas of greenschist facies metamorphism close to the amphibolite facies isograd; both feature ultramafic rocks interbedded with volcanics; and both lie in or adjacent to structural corridors referred to as deformation zones.

Encouraged by the drill results from the Company's 2006 and 2007 drill program that returned such results as the 125.59 g/T Au across 0.40 metre and 13.80 metres averaging 1.65 g/T Au., the Company conducted a twelve-hole, 1,500-metre program of diamond drilling for the 2008 field season.

The 2008 drilling program was designed to test the main gold zone by drilling in a northwest direction, as previous drill holes were oriented at an acute angle to the trend of the formations. It also included two deep holes, as well as two holes on a possible northern extension of the main zone. The 2008 drilling program was completed. A total of 901 samples have been split and sent for chemical assaying. Twenty-five separate veins containing visible gold were intersected in nine of the 2008 diamond drill holes.

The Company has delayed its exploration program to future years. The Company intends to monitor and provide updates on its future exploration programs as market conditions change.

Uchi Lake Gold Property at Red Lake, Ontario

On November 22, 2006, the Company entered into an option agreement to earn a 100% interest in the Uchi Lake gold property east of Red Lake, Ontario. To exercise such option, the Company is required to make cash payment of \$200,000 over 30 months, issue 2,000,000 common shares and incur \$500,000 exploration expenditures over a three-year period. The property is subject to a 2% net smelter return royalty where the Company can buy down to a 1% NSR at a cost of \$1,000,000. As of the date of report, the Company had made the required payments totaling \$200,000 in cash and issued 2,000,000 common shares to the vendor.

The Uchi Lake property consists of 20 mining claims with a total area of approximately 800 acres, within the Burch-Uchi-Confederation Lakes greenstone belt, 90 kilometres east of Red Lake. The property has been explored for gold at various times since 1937, with the bulk of the drilling activity taking place in 1993 and 1994.

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

The Company planned to conduct an exploration program on the property, including prospecting, power stripping and diamond drilling, both on the Woco Vein and other areas of gold potential. These include the Uchi Lake deformation zone, which lies in the south-eastern part of the property and has seen very little prior exploration, and the north-south shear structure that hosts the Uchi Gold Mine. The Uchi Mine, which lies 1.2 kilometres north of the property, produced 114,000 ounces of gold between 1937 and 1942. Its host structure, which crosses the property, is not exposed; it was drilled in 1937 but results are no longer available. The Company had started preliminary consulting work on the property. However, due to unfavourable market conditions and high field costs, the Company has delayed its 2009 program to future years. The Company intends to monitor and provide updates on its future exploration programs as market conditions change.

Mina Real and Santa Fe Properties, Mexico

Pursuant to an Agreement dated November 20, 2008 and an Amendment Agreement dated January 16, 2009, the Company entered into a Joint Venture Agreement with Rochester Resources Ltd. ("Rochester") and paid \$1,475,000 cash and acquired 3,500,000 common shares of Rochester at a deemed price of \$0.15 per share to acquire an undivided 10% equity interest in the capital stock of Mina Real Mexico S.A. de C.V. ("Mina Real"), a private company incorporated in Mexico which is wholly owned by Rochester. Mina Real currently holds certain mining concessions and claims covering 20,662.42 hectares (the "Mina Real Property") located in Tepic, Mexico. In addition, Mina Real holds a 70% equity interest in Compania Minera Santa Fe S.A. de C. V. ("Santa Fe") which holds certain mining concessions and claims (the "Santa Fe Property") located in Tepic, Mexico.

Pursuant to the Joint Venture Agreement, the Company is entitled to a gross overriding advance royalty payment of \$25,000 per month, free and clear of any and all cost or expense of every kind and nature; whatsoever, incurred in connection with the operation of the Mina Real Property. The gross overriding advance royalty payment may be credited against the Company's 10% share of the net profit of the Mina Real Property and Santa Fe Property. However, the payment is not dependent on the profitability of the properties and shall be payable even if the properties do not generate any profit. Under the Joint Venture Agreement, Rochester has an option to re-acquire the 10% interest in Mina Real from the Company (the "Back-In Option"). The Back-In Option has a term of three years commencing on December 22, 2008 and may be exercised by Rochester as follows:

- (i) During the second year of the term, by payment of \$2,075,000 cash to the Company; and,
- (ii) During the third year of the term, by payment of \$2,000,000 in cash to the Company.

The Back-In Option shall not be exercised during the first year of the term.

The Company has been searching for a strategic partner and project that fulfilled its objectives of generating revenue streams and potential for significant mineral discovery. With the Joint Venture Agreement with Rochester Resources Ltd., the Company feels that it has secured an agreement that achieves this objective. The Company believes the investments in these Mexican properties will diversify the Company's operation and generate some cash flows.

The Company and Rochester are related by way of sharing certain common directors.

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

Property Acquisition and Deferred Exploration Expenditures

The Company defers the cost of acquiring, maintaining its interest, exploring and developing mineral properties until such time as the properties are placed into production, abandoned, sold or considered to be impaired in value. As at March 31, 2010, a total of \$4,979,952 was recorded on acquisition and exploration of mineral properties. All of these costs were deferred.

A summary of capitalized acquisition and exploration expenditures on the Company's properties for the year ended March 31, 2010 is as follows:

Mineral Properties	Stormy Mountain	Rivard Gold Property	Uchi Lake Property	Mina Real and Santa Fe	Total
	\$	\$	\$	\$	\$
Acquisition costs					
Balance March 31, 2009	258,500	910,005	510,000	1,475,000	3,153,505
Incurred during the period	-	70,002	50,000	-	120,002
Balance March 31, 2010	258,500	980,007	560,000	1,475,000	3,273,507
Exploration costs					
Balance March 31, 2009	41,077	1,603,873	33,331	25,644	1,703,925
Incurred during the year:					
Assay camp and general	2,520	-	-	-	2,520
Geological and geophysical	-	-	-	-	-
Total incurred during the period	2,520	-	-	-	2,520
Balance March 30, 2010	43,597	1,603,873	33,331	25,644	1,706,445
Cumulative Mineral Property Expenditures as at March 31, 2010					
Acquisition	258,500	980,007	560,000	1,475,000	3,273,507
Exploration	43,597	1,603,873	33,331	25,644	1,706,445
Total:	302,097	2,583,879	593,331	1,500,644	4,979,952

Selected Annual Information

The following financial data is derived from the Company's audited financial statements for the year ended March 31, 2010, 2009 and 2008.

		As at and for the financial year ended March 31		
		2010	2009	2008
(a)	Net sales or total revenues	Nil	Nil	Nil
(b)	Net Income (loss)			
	In total	(\$261,813)	\$157,845	(\$867,621)
	On a per share basis	(\$0.004)	\$0.003	(\$0.01)
(c)	Total Assets	\$7,326,258	\$7,592,958	\$7,378,080
(d)	Total long term financial liabilities	Nil	Nil	Nil
(e)	Cash dividends declared per share	Nil	Nil	Nil

E-ENERGY VENTURES INC.
 FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
 FOR THE YEAR ENDED MARCH 31, 2010

Results of Operations

The Company had no producing properties, and consequently no sales or revenues.

For the year ended March 31, 2010, the Company reported a net loss of \$261,813 or (\$0.004) per share as compared to an income of \$157,845 or \$0.003 per share for the year ended March 31, 2009.

Income for the year consisted of royalty income of \$300,000 (2009 - \$50,000), interest income of \$28,083(2009 - \$192,769) and unrealized loss on investments of \$290,000 (2009 - \$245,000). The Company had started to collect royalty income of \$25,000 per month since February 2009 from its Mexican joint venture partner. The Company's excess cash reserves are held in short term flexible GIC's and earned interest income that fluctuates from period to period depending on the Company's cash balance and interest rates. The reduction in interest income for fiscal 2010 was due to lower interest rate earned on term deposit and lower average cash balance deposited in the bank. An unrealized loss on the investment in Rochester of \$290,000 was recorded in income due to the fall in share price at March 31, 2010.

General and administrative expenses for the year ended March 31, 2010 totaled \$299,896 as compared to \$329,924 in 2009, a decrease by \$30,028. Overall, the expenses declined slightly in fiscal 2010 due to cost cutting measures. Consulting fees were down by \$29,250. The Company also reduced travelling expenses from \$6,605 in fiscal 2009 to \$nil in fiscal 2010. Other than these, there were no significant fluctuations in the components of the expenses between the two comparable years.

Summary of Quarterly Results

The following tables summarize information derived from the Company's financial statements for each of the eight most recently completed quarters:

Quarter Ended	Mar.31	Dec.31	Sep.30	Jun.30	Mar.31	Dec.31	Sep.30	Jun.30
Year	2010	2009	2009	2009	2009	2008	2008	2008
Revenues	Nil	Nil	Nil	Nil	Nil	Nil	Nil	Nil
Net Income (Loss)	(\$285,569)	\$324,507	(\$345,425)	\$44,674	\$192,828	\$45,194	(\$46,577)	(\$33,600)
Basic & Diluted Income(Loss) per share	(\$0.00)	\$0.01	(\$0.00)	\$0.00	\$0.01	\$0.00	(\$0.00)	(\$0.00)

Quarterly net income or loss has fluctuated over the past eight quarters are largely due to variations in non cash items: the unrealized loss on investments and stock based compensation.

The Company reported net income in the first and third quarters of the current fiscal year. The rise in the share price of the marketable securities was the major reason for the reported income as the Company recorded unrealized gain on the investments at June 30, 2009 and December 31, 2009. For the same reason, the Company reported a net loss in the second and fourth quarters of fiscal 2010 as a result of the decline in share price at September 30, 2009 and March 31, 2010 respectively.

The Company did not record stock based compensation expense in all the quarters of fiscal 2009 and 2010 because no stock options were granted in the past eight quarters.

Liquidity and Capital Resources

At March 31, 2010 the Company had a net working capital of \$2,345,123 as compared to a net working capital of \$2,729,244 as at March 31, 2009.

The Company has cash and cash equivalents of \$159,239 and short term investments of \$1,004,585 on its balance sheet. The short term investments are flexible GIC held in a major bank and can be easily converted to cash. The Company believes that it has adequate fund to support its planned exploration and administrative budget for the next twelve months.

To date, the Company has financed its activities by the private placement of equity securities. The Company has been successful in raising the above funds. However, there is no assurance that equity funding will be accessible to the Company at the times and in the amounts required to fund the Company's activities. The Company is dependent on investor sentiment remaining positive towards the mining exploration sector so that funds can be raised through the sale of its securities. Many factors have an influence on investor sentiment, including a positive climate for mineral exploration, a company's track record and the experience of a company's management. The other sources of funds potentially available to the Company are through the exercise of outstanding warrants and stock options.

The global financial economy has recently experienced significant volatility and uncertainty. The stock market values have plunged. These could negatively affect the accessibility of equity funding. Presently the Company is in good financial conditions. However, the Company expects there to be a serious shortage of available capital and exploration risk to the resource industry for a number of years to come, and the Company intends to manage its cash resources and review opportunities as circumstances demand.

Off-Balance Sheet Arrangement

The Company does not have any used lines of credit or other arrangements in place to borrow funds, and has no off-balance sheet arrangements.

Transactions with Related Parties

The Company entered into the following transactions with related parties:

- a) Accrued or paid \$60,000 (2009- \$60,000) for consulting fees to a company controlled by a director of the Company.
- b) Accrued or paid \$30,500 (2009 - \$30,000) for accounting fees to company related to a director of the Company.
- c) Accrued or paid rent of \$18,000 (2009 - \$17,000) to a company related to a director of the Company.

The amounts charged to the Company for the services provided have been determined by negotiation among the parties and in certain cases, by signed agreements. These transactions were in the normal

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

course of operations and were measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

Fourth Quarter and Subsequent Events

In the fourth quarter, the Company recorded a net loss of \$285,569 as compared to an income of \$192,828 for the same quarter last year. The change from reported net income to reported net loss was mainly due to the unrealized loss on the marketable securities of \$292,500 as compared to an unrealized gain of \$210,000 for the same quarter last year. General & administrative expenses for the fourth quarter were \$68,815 (2009 - \$74,622). There were no significant variations in the expenses incurred for the two comparable quarters.

Proposed Transactions

There were no proposed transactions during and subsequent to the quarter.

Changes in Accounting Policies including Initial Adoption

Newly Adopted Canadian Accounting Standards and Financial Statements Concepts

During the year, the Company adopted the following accounting standards:

Goodwill and Intangible Assets

Section 3064, "*Goodwill and Intangible Assets*" replaces Section 3062, "*Goodwill and Other Intangible Assets*" and Section 3450, "*Research and Development Costs*". Section 3064 establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The new section will be applicable to financial statements relating to fiscal years beginning on or after October 1, 2008. Accordingly, the Company has adopted the new standards for its fiscal year beginning April 1, 2009. The adoption of this standard has had no material impact on the Company's financial statements.

Financial Statement Concepts

In February 2008, the CICA issued amendments to Handbook Section 1000, *Financial Statement Concepts* to clarify the criteria for recognition of an asset and the timing of expense recognition. The Company's adoption of these amendments effective April 1, 2009 did not have any impact on its financial statements.

Financial Instruments – Disclosures

In June 2009, the CICA Handbook Section 3862 was amended to include additional disclosure requirements about fair value measurements of financial instruments and to enhance liquidity risk disclosure. The additional fair value measurements disclosures include classification of financial instrument fair values in a fair value hierarchy comprising three levels reflecting the significance of the inputs used in making the measurements, described as follows:

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2 – Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly such as quoted prices for similar assets or liabilities in active markets or indirectly such as quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions; and
Level 3 – Inputs that are not based on observable market data.

Changes in valuation methods may result in transfers into or out of a financial instrument's assigned level. During the year ended March 31, 2010, there were no transfers between level 1, 2 and 3. The Company has included the required disclosures in Note 16 to these financial statements.

Impairment Testing of Mineral Exploration Properties

EIC-174 discusses the analysis recommended to be performed to determine if there has been an impairment of mineral exploration properties. These recommendations were adopted by the Company on January 1, 2009 and did not have a material impact on the Company's consolidated financial statements.

Future Accounting Changes

Business Combinations/Consolidated Financial Statements/Non-Controlling Interests

In January 2009, the CICA issued Handbook Sections 1582 "*Business Combinations*", 1601 "*Consolidated Financial Statements*" and 1602 "*Non-controlling Interests*" which replace CICA Handbook Sections 1581 "*Business Combinations*" and 1600 "*Consolidated Financial Statements*". Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under International Financial Reporting Standards ("IFRS"). Section 1582 is applicable for the Company's business combinations with acquisition dates on or after the beginning of the first annual reporting period beginning on or after January 1, 2011. Early adoption of this Section is permitted. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. Early adoption of these sections is permitted. If the company chooses to early adopt any one of these sections, the other two sections must also be adopted at the same time. The Company is currently assessing the impact of these standards prior to implementation.

International Financial Reporting Standards ("IFRS")

In February 2008, the Canadian Accounting Standards Board announced that 2011 is the changeover date for publicly accountable profit-oriented enterprises to use IFRS, replacing Canadian GAAP for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The Company will commence reporting in IFRS in the first quarter of the 2011 fiscal year, with comparative figures.

The company will use a four phase approach to ensure successful conversion to IFRS, including:

- diagnostic impact assessment
- design and planning
- solution development and
- implementation

E-ENERGY VENTURES INC.
FORM 51-102F1 MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED MARCH 31, 2010

The Company has begun developing its detailed IFRS conversion plan, including commencement of an education process for management and the board of directors, and evaluating the effect of the new standards on its financial statements.

The Company has identified six major areas to date that will impact the financial statements under IFRS, including:

- Mineral properties
- Impairment of mineral properties
- Stock based compensation
- Revenue recognition
- Income taxes and
- First-time adoption of International Financial Reporting Standards (IFRS 1)

It is not practically possible at this time to quantify the impact of these differences.

Financial Instruments and Other Instruments

All significant financial assets, financial liabilities and equity instruments of the Company are either recognized or disclosed in the financial statements together with other information relevant for making a reasonable assessment of future cash flows, interest rate risk and credit risk.

The Company's financial instruments consist of cash and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest rate risk or credit risk arising from these financial instruments. The fair value of these financial instruments approximates their carrying value due to their short-term maturity. The fair value of cash is measured based on level 1 of the fair value hierarchy.

Outstanding Share Data

As at the date of this MD&A, the Company had the following securities issued and outstanding:

Common shares	61,471,330
Warrants	Nil
Stock options	2,000,000

There were 2,000,000 stock options outstanding under the Company's incentive stock option plan. These stock options are exercisable at price ranging from \$0.14 to \$0.50, with expiry dates ranging to September 12, 2012.

Additional Information

Additional information pertaining to the Company can be found on SEDAR at www.sedar.com.
